

Computer Vision Fall 2015

Project “What is it?” – An application for Google glass.

Instructor: Thanh Ha Le.

Student: Dinh Minh Le, Tung Long Vuong, Phong Nam Nguyen

1. Introduction

With this application, understanding the world around you has never been easier. Simply take a picture of any object and the app uses mobile visual search technology to tell you what it is. The app provides fast, accurate results with no typing necessary. Just say "Ok glass, what is it" to learn more about whatever you're looking at.

In this application we use mobile visual search technology provided by [CloudSight](#).

2. Instructions:

- Launch app in Google glass by say "Ok glass, what is it".

- The app bring you to a camera screen.
- Take a photo by tap once on the touchpad of the Glass.
- The captured image shown and you have to wait for 6 to 12 seconds to get the information about object in the image. You can tap once to go back to the camera screen.
